

Overview

Hosted Exchange, the popular Microsoft email and productivity solution, is now available in a new reliable, resilient, feature-packed version. In addition to email, calendar and document sharing, CYBOX brings you streamlined Outlook Web App interface and enhanced touch for mobile users, the possibility to gather all contacts from various locations (Facebook, LinkedIn, address books etc.) in one place, and a convenient tool that memorizes your behavior for easier, faster searches.

What is CY.BOX?

CY.BOX is Microsoft Hosted Exchange 2013 in Canada which is a high-end **business email and collaboration solution** that we host on a top-of-the-line infrastructure maintained by Microsoft Certified Engineers. We provide the latest Outlook applications that allow rich email creation, management and archiving, as well as calendar, tasks, contacts. With the addition of ActiveSync **mobile synchronization**, you can access your emails in real-time on your smartphone through PUSH technology. CY.BOX is quick and easy to deploy, and you can add or remove users at will through our user friendly control panel.

Mobility	Flexibility	Efficiency	Outlook 2013
<ul style="list-style-type: none"> Stay connected to your inbox thanks to real-time synchronization on your iPhone/iPad, Android, Windows Mobile or any smartphone Get more done when you're on the move! 	<ul style="list-style-type: none"> Securely access your inbox through the full-featured and familiar Outlook Web App (OWA) from virtually any platform, web browser, or mobile device. 	<ul style="list-style-type: none"> Share calendars or distribution lists with clients, just as if they were part of your organization. 	Benefit from many improvements: <ul style="list-style-type: none"> Cleaner, uncluttered look Faster emails and quick deletes Easier access to contact information from social networks Forgotten attachment reminders

The Hosted Model

As technology grows more sophisticated and IT departments are asked to **do more with fewer resources**, the hosted software model is becoming a preferred deployment option for many businesses. This approach proves to be more **cost-effective** than traditional alternatives as it requires **no hardware investment** and **no additional IT resources**. Gone are the days of complex deployments and high upfront and maintenance costs: hosted software is quick to deploy and comes at a **fixed price per user per month**. Additionally, your business-critical applications are no longer subject to in-house network stability and security concerns. CreateITIVITY uses an entirely **clustered and redundant architecture** hosted in fully certified datacenters.
