

## Overview

Stop spam before it reaches your domain with the ability to filter UNLIMITED email addresses. CY.GUARD-MAIL is a Managed Spam Filtering as a Service offered by CreateITIVITY. Our domain wide filtering plan includes 100,000 inbound messages free per month (clean or spam) – less than 1% of our customers ever exceed the included allotment. Implementing CY.GUARD-MAIL will help you save costs due to extreme efficiency in dealing with email, we will optimize resource usage, offload your support, whilst providing you 24/7 monitoring and weekly release-cycles with new features!

## Key Features & Benefits

- **Incoming Filter** – Secure your network from spam, virus, and phishing and malware attacks with CY.GUARD-MAIL's proprietary self-learning smart technologies to filter all incoming email, eliminating spam before it reaches your network.
- **Outgoing Filter** – Not being able to send outgoing email, dealing with related user/client support, and spending effort on getting delisted are very time consuming, and costly undertaking that you shouldn't have to worry about – let us take on this challenge so you can focus on your business – you won't have to worry any longer about the reputation of your IP address.
- **Email Archiving** – Since email is now a main means of communication, it must be protected yet be easily retrievable. Through archiving, email is never lost! Legally in many countries, incoming and outgoing mail must be treated the same as postal communication. Lack of email archiving can result in Legal trouble, severe fines and loss of court cases, not to mention a damaged reputation.
